Donations

Make a Donation

\$ 0.00 ↔ ETH: 0.000

Total Donations: \$1,234,567

Number of Donations: 98765

Your Donations

\$ 5.00

\$ 10.00

\$ 5.00

Donations

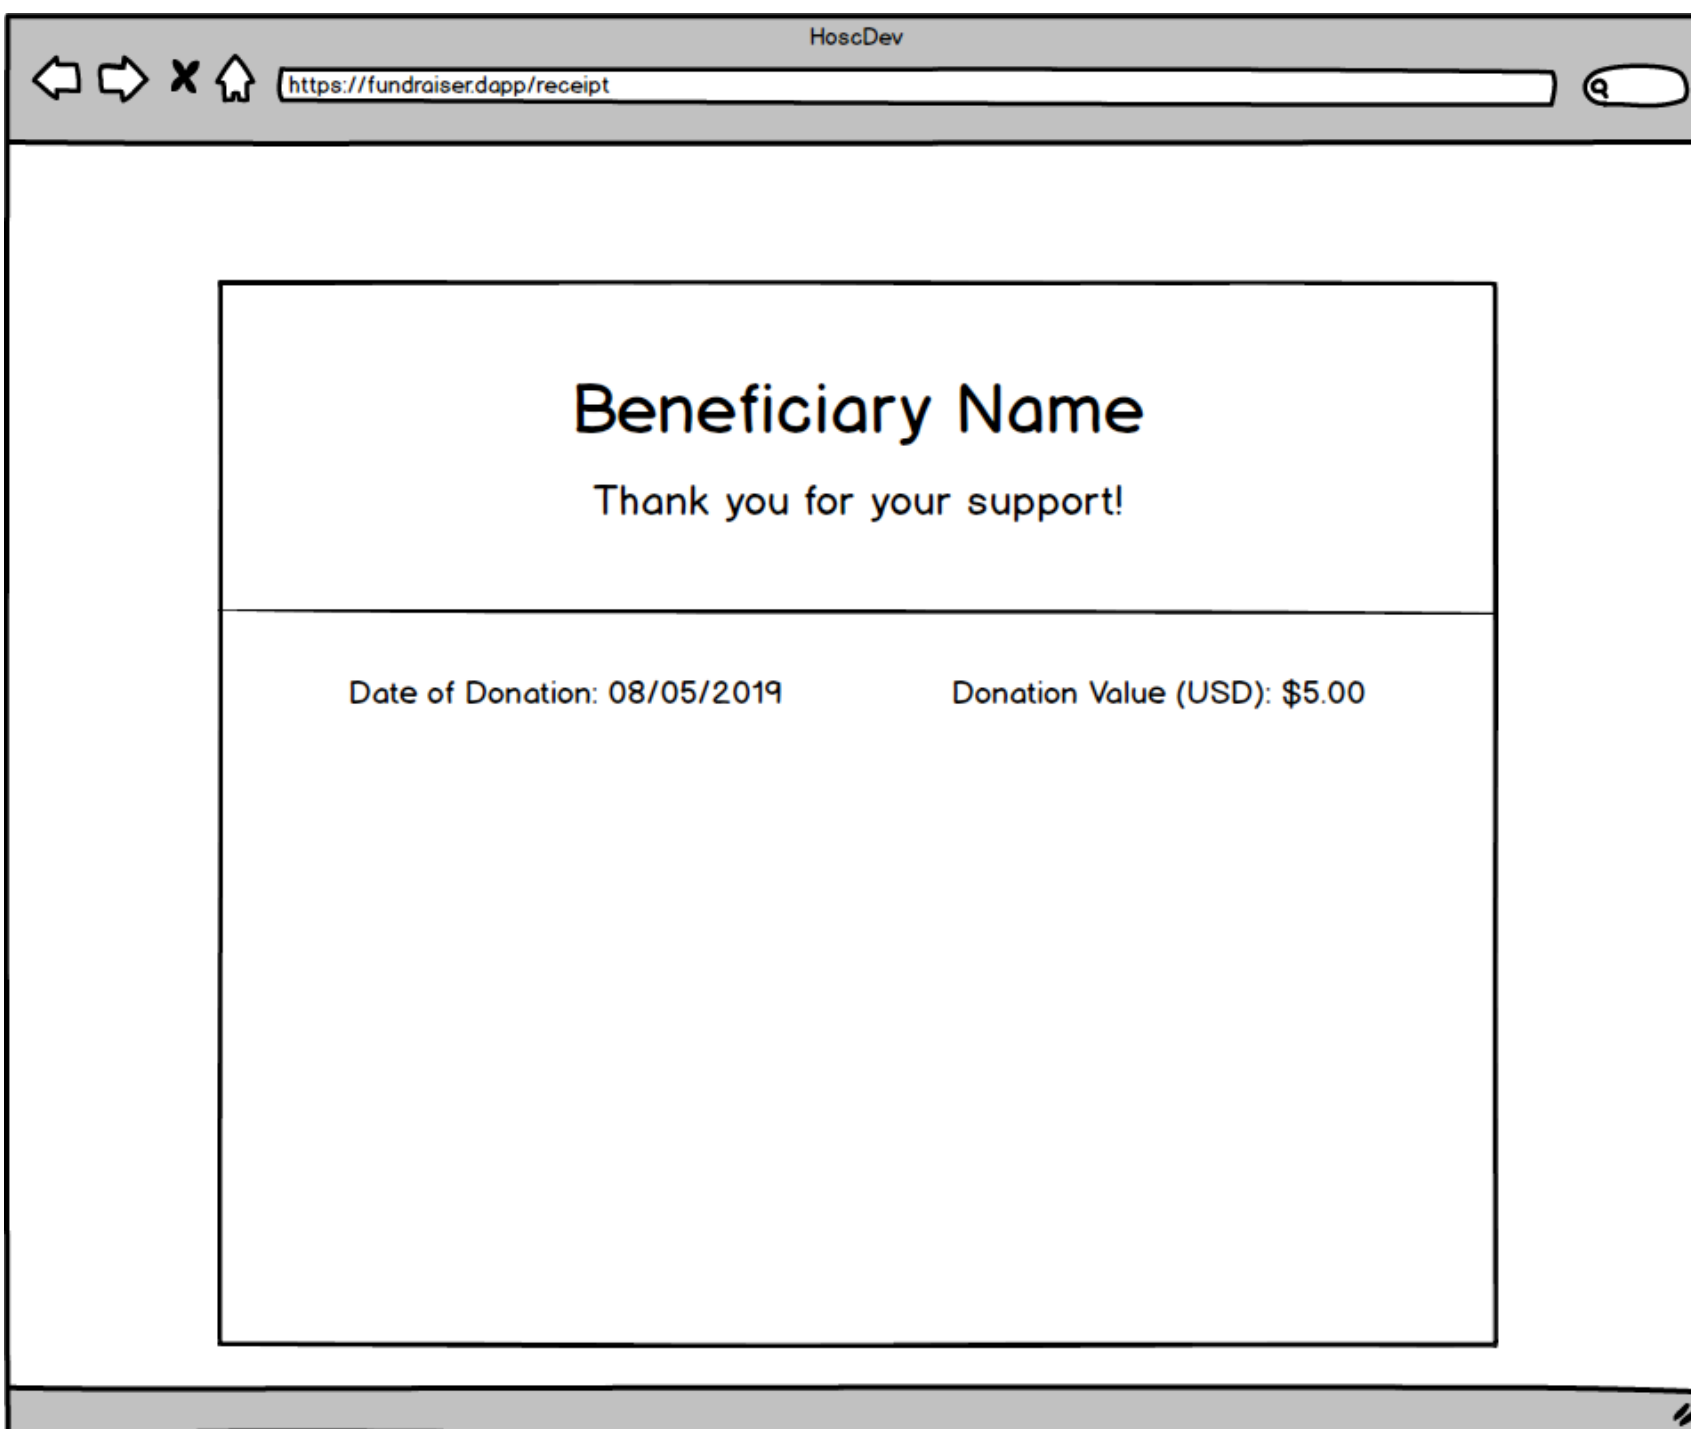

1 - If no donations are present, some text like "you haven't contributed yet" should be where the donations list is currently located

2 - The conversion factor will need to hit an API to get the current exchange rate. When the user updates the USD field it should update the ETH amount

3 - When they click donate it sends the transaction to the fundraiser contract. We should add the date and exchange rate to the payload as well. We'll store the date as a string in "YYYY-MM-DD" format.

4 - When the transaction successfully completes

- Update total donations and number of donations
- Append Donation to "Your Donations" area

Receipt:

Thinking this would be introduced as a modal, then trigger the `window.print()` method with print styles loaded up.
